June 6, 2003

The attached report represents a consolidation of Reports of Condition filed by state-chartered banks with the Missouri Division of Finance as of March 31, 2003, and a comparison with the statements filed one year earlier.

Also included is a comparison of financial statements of state-chartered and national banks.

During the previous twelve months, the number of state-chartered banks and trust companies declined by six from 316 to 310. Six banks merged into other Missouri state-chartered banks. Two banks merged into out-of-state institutions. One non-deposit trust company merged into another state-chartered non-deposit trust company. One new bank charter (converted from a national bank) and two new non-deposit trust company charters were granted.

Assets in state-chartered banks totaled \$50.1 billion on March 31, 2003, an increase of 15.7 percent from one year earlier. Deposits were \$41.1 billion, up 14.5 percent. The growth achieved was largely due to a bank merger during the first quarter of 2003 that increased total assets in state-chartered banks by over \$3 billion.

Total loans were \$34.3 billion on March 31, 2003, up 15.6 percent.

The equity capital ratio increased to 10.26 percent. Primary capital, which includes the allowance for loan losses, increased to 11.13 percent of total assets. These increases were influenced by a large increase in intangible assets. The tangible equity capital ratio increased at a much slower pace to 8.90 percent.

Net income in state banks was up 16.3 percent from March 2002. Return on assets among state-chartered banks was 1.16 percent compared to 1.15 percent in March 2002.
